

PUPP NEWSLETTER

April 2020

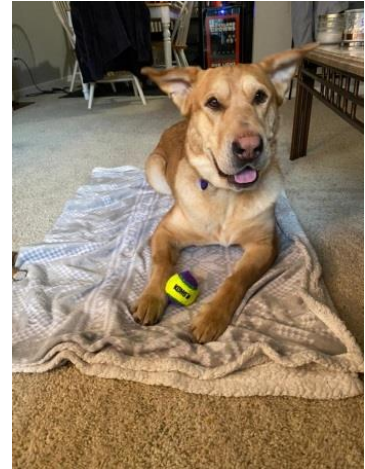

We had 12 adoptions in April and these dogs were trained in PUPP.

Penelli and I have been going on lots of walks in the large park behind my house. She is a extremely good listener and obeys her commands great. Took a little bit getting used to the cat and will still need some work. But she has made great improvements in that area since she got here. She leaves the cat alone 90% of the time. Sometimes when the cat is trying to play she will chase him but will not growl or show her teeth when chasing him and she comes back to me immediately when I call her. We went on a hike this past weekend and had a blast. She is my new best friend and I am so happy to have her in my life.

Chevy's doing well.

Morty is doing really well! He's interested in the cat but will leave her alone when commanded. She is not happy that he is here, but I'm sure she will get over it eventually. Hopefully with time they can coexist!

Daniel was first in this foster home, moved for training and had several more foster homes where he had bad behavior and then moved back for more training. We returned him to his first foster home and now he was adopted there and it's where he wants to be. Cyrus and Daniel are best friends and do everything together.

Olivia being cute.

Things are still going well with Jersey, different challenges each day but overall making lots of progress. She's a lot of fun, Blue can be very serious and she's much goofier. She and Blue have been playing a ton in the yard and both seem excited about each other. I walked into the room and found them like this and thought it was pretty cute, more or less the first time they've cuddled together without one of us coaxing them. Milestone!

This is Suzie... My first foster and my first fail. I figured this would happen. She's such a well behaved and sweet little girl who has totally come out of her shell around me. There's still work to do, but I'm happy it's me who gets to help her achieve the best quality of life possible. Welcome to the fam Suzie! 🐾❤️

Kate had a great night last night, she slept in her kennel with no fuss. We've taken her on a couple of walks at the neighborhood park so far, she gets pretty excited when she sees other dogs or squirrels but we get her refocused pretty quickly. She chased a rabbit that got into our backyard this morning, again we kept her in our control, but she spent the next 15 minutes looking out the window for it. She's eating on schedule and seems to be content. We are certainly happy to have her.

These 2 have become best friends ! Chase is settling into a routine and is such a good boy. They have actually worn each other out by the afternoon and take naps now

Hunter is living as the only dog on 2 acres out in the country. His life is full of playing frisbee and nature walks. His owner writes: Hunter is an awesome dog and I am bonding with him quickly. I'm already head over heels for him!

They are working on his growling at strangers problem. Good surprise is that Hunter was electric fenced trained previously and they have an electric fence installed. Inside he responded to the beeps coming from the refrigerator as a warning to stay out of the kitchen.

Alvin needed a place to stay after he graduated our program, so one of our fosters stepped up... well, he very quickly wormed his way into her heart and she just couldn't let him go! Now they are best buds, inseparable, and he's learning how to be a resident foster brother so they can continue to help more dogs! Thank you so much for helping me find my best friend fur-ever! I love Alvin more than words can describe. You are all doing incredible work and I wish you all the best.
